# DW (3:1, 4:1)

## Dual wall, high-shrink-ratio, adhesive-lined flexible polyolefin tubing

### **Application**

DW (3:1, 4:1) is a flexible, flame-retardant, dual wall, high-shrink-ratio, irradiated heat-shrinkable tubing manufactured by co-extrusion of polyolefin and hot-melt adhesive. Inner is hot-melt adhesive with good stickness and outer is flexible, irradiated cross-linked polyolefin. It is widely used to environmentally seal and protect interconnections, joints and components from fluids, moisture and corrosion. High shrink ratio allows for connector-to-cable sealing and makes it possible to repair most damaged cable jackets without removing connectors.

#### **■** Features/Benefits

- Shrink ratio: 3:1, 4:1.
- Environmentally seals and protects components, joints and interconnections from fluids, moisture and corrosion.
- Good mechanical, electrical and chemical properties.
- Adhesive has good stickness and bonds to a wide variety of plastics, rubbers and metals.
- Conform to RoHS and Sony-ss00259 environmental directive.

### **■** Operating Temperature Range

• Operating temperature range: -55 °C ~110 °C

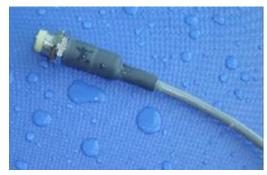

• Minimum shrink temperature: 80°C

• Minimum full recovery temperature: 110°C

#### **■** Specifications/Standards

UL224 125°C 600V

AMS-DTL-23053/4 class3

## **■** Specification values

|             | Property                      | Requirement                                    | Test method | Typical value          |
|-------------|-------------------------------|--|-------------|------------------------|
| Physical:   | Tensile strength              | 9.0MPa min.                                    | ASTM D 638  | ≥12MPa                 |
|             | Elongation                    | 200% min.                                      | ASTM D 638  | ≥400%                  |
|             | Heat shock                    | No cracking, dripping or flowing of outer wall | ASTM D 2671 | Pass                   |
|             | Low temperature flexibility   | No cracking                                    | ASTM D 2671 | Pass                   |
|             | Aging 158℃,168hrs             |  |             |                        |
|             | Tensile strength after aging  | 70% of original min.                           | ASTM D 638  | ≥90%                   |
|             | Elongation after aging        | 100% min.                                      | ASTM D 638  | ≥300%                  |
| Electrical: | Dielectric voltage withstand  | 2500V, 60sec<br>no breakdown                   | ASTM D 2671 | Pass                   |
|             | Volume resistivity            | $10^{14}\Omega$ ·cm min.                       | ASTM D 876  | ≥10 <sup>14</sup> Ω·cm |
| Chemical:   | Copper corrosion 158°C,168hrs | No corrosion                                   | ASTM D 2671 | Pass                   |

<sup>\*</sup> Wall thickness includes adhesive wall thickness.

# **■** Ordering information

·Standard color: Black(-BK)

•Nonstandard color: Special colors can be available upon request.

#### ·Nonstandard size

Special sizes are available upon request.

### ·Standard packaging

1.2m/length or on spools. Cut pieces are available upon request.

### **Ordering description**:

Specify product type, size and color.
