

## SUBMINIATURE TYPE

### 922, 923, 924 Series Incandescent Lampholders

The mating lens caps accept a T-1<sup>3/4</sup> midget flanged base incandescent lamp, held in the lens assembly by means of a friction fit which insures good contact and prevents the lamp from falling out when the lens is removed. A lens assembly must be used with the holder to hold the lamp in proper relationship to the socket contact.

**APPROVALS:** Recognized under the Components Program of Underwriters Laboratories and Certified by CSA.

**SPECIFICATIONS:**

**Housing:** Brass. Black nickel finish. White nickel or chrome finish optional.

**Internal Tooth Lockwasher:** Phosphor bronze. White nickel finish.

**Hex Nut:** Brass. 922 and 923 Series: White nickel finish. 924 Series: Same finish as housing finish.
