# Continuous Duty PowerSeal

*"The first contactor designed specifically for electric vehicles"* 

The case for the Trombetta Continuous Duty PowerSeal is environmentally sealed it passes IEC 60529, IP66 and IP67. It is the first contactor designed specifically for electric vehicles and the applications requiring tough environmental conditions. The PowerSeal is available in the 12 volt intermittent duty or the 12 volt to 48 volt continuos duty. The environmental seal is the centerpiece of the optimized design for higher performance and lower cost. Specific applications that the PowerSeal powerfully supports include: electri pallet jacks, forktrucks, floor scrubbers, utility vehicles, and golf carts. Whatever

electric vehicles require efficient, powerful performance, Trombetta's PowerSeal is the optimized solution ... case sealed.

## **Continuous Duty PowerSeal Specifications**

**Coil Terminals** 2: 10-32 Studs **Contact Studs** 5/16-24 Studs Mounting Bracket L, Flat, 900, L Flat, L Curved, and Flat L Wide Standard Operating Temperature Range -40° C to 65° C 12V, 36V, and 48V Can carry 300 amps for 60 seconds or 400 amps for 30 seconds 12V, 36V, and 48V Can interrupt current - 400 amps for 100 cycles over the expected product electrical life

Coils						Contact

1Nominal coil voltage applied starting from 25° C DC Contactor temperature. Duty Cycle=On Time/(On Time + Off Time). 2Voltages listed are minimum required at 25° C coil temperature. Minimum voltage requirements will increase with coil temperature. <sup>3</sup>Amps at Max Duty Cycle. <sup>4</sup>Risetime > 3 milliseconds to 80% of peak inrush with linear decay to run (carry) current in ≤.1 seconds.
